

The Kansas Water Science

Center Presents:

Science Seminar Series

August 4, 2021

1:00pm CDT

Harmful Algal Bloom (HABs) research with the USGS

Join us August 4, 2021 at 1pm for our quarterly seminar series. This Quarter's seminar is focused on harmful algal blooms (HABs).

"Toxic Cyanobacteria Blooms and Their Health Effects: A USGS Research Perspective" by Keith Loftin. We will discuss USGS' ongoing National research efforts working towards understanding toxic cyanobacteria bloom dynamics, health effects, methods, monitoring, modeling, and their socioeconomic consequences. This talk will be followed by "Field Verification of Cyanobacteria Assessment Network (CyAN) satellite products in Kansas Reservoirs" by Brianna Leiker. Access the seminar event [here](#).

Keith Loftin – Research Chemist, Algal and Other Environmental Toxins (AET) Laboratory Supervisor, Organic Geochemistry Research Laboratory
Science Team Lead, USGS EHMA Toxins and Harmful Algal Bloom Team
kloftin@usgs.gov

Brianna Leiker – Hydrologist
