North Pacific Pelagic Seabird Database (NPPSD)

Literature on methods for conducting pelagic seabird surveys. Titles in boldface indicate primary instruction manuals or papers for conducting surveys. Atlases of seabird distribution data are indicated with *, and these usually detail methods of data collection also. Thanks especially to Jan van Franeker for help in compiling these references.

Ballance, L.T. 2002. Seabird survey instruction manual. Unpublished Document available from Lisa T. Ballance, Ecology Program, Southwest Fisheries Science Center, 8604 La Jolla Shores Drive, La Jolla, CA 92037; [lisa.ballance@noaa.gov]; See also Philbrick et al.

Dixon, T.J. 1977. The distance at which sitting birds can be seen at sea. Ibis 119: 372-375.
