SODA ASH IN AUGUST 2021

In August, soda ash production was 878,000 metric tons (t), a 10% decrease compared with the previous month's production but 4% more than that of August 2020. For the first 8 months of 2021, soda ash production was 7.7 million metric tons (Mt), 18% more than the revised total for the same period of 2020. Ending stocks in August decreased to 236,000 t, 10% less than those of the preceding month (tables 1, 4). In recent months, demand for soda ash nearly returned to levels seen before the global COVID-19 pandemic began. As a result, apparent consumption, exports, and production reported for the first 8 months of the year increased substantially.

Wyoming trona production in August 2021 was 1.52 Mt, 8% less than the revised production of July 2021 but 51% more than that of August 2020. For the first 8 months of 2021, trona production was 11.5 Mt, 20% more than the revised total for the same period of 2020 (table 1).

Exports of soda ash decreased in August 2021 to 452,000 t, 11% less than those of July 2021 but 25% more than those of August 2020. For the first 8 months of 2021, exports were 4.5 Mt, 22% more than for the same period of 2020 (table 2, 4).

Imports of soda ash in August 2021 were 792 t compared with 373 t in July 2021. For the first 8 months of 2021, imports were

47,700 t, 29% less than the revised total for the same period of 2020. Soda ash import tonnages can differ significantly from month to month, but generally are much smaller than soda ash export tonnages (tables 3, 4).

Apparent consumption for August 2021 was 453,000 t, 3% more than that of July 2021 and 8% more than the total for August 2020. For the first 8 months of 2021, apparent consumption was an estimated 3.32 Mt, 16% more than the revised estimated total for the same period of 2020. Apparent consumption can change significantly from month to month mostly owing to variation in the quantity of exports but usually stabilizes over the course of the year (table 4).

All percentages in this report were calculated using unrounded data.
