

## **Sediment Acoustics – Site Studies Sources**

Gray, J. R., & Landers, M. N. (2013). Measuring suspended sediment: Chapter 10. In S. Ahuja (Ed.), *Comprehensive Water Quality and Purification* (pp. 157-158-204).

Landers, M. N. (2011). *Fluvial suspended sediment characteristics by high-resolution, surrogate metrics of turbidity, laser-diffraction, acoustic backscatter, and acoustic attenuation*. Georgia Institute of Technology.

Medalie, L., Chalmers, A. T., Kiah, R. G., & Copans, B. (2014). US Geological Survey.

Topping, D. J., Melis, T. S., Rubin, D. M., & Wright, S. A. (2004). *High-resolution monitoring of suspended sediment concentration and grain size in the Colorado River in Grand Canyon using a laser-acoustic system*. Paper presented at the Proceedings of the Ninth International Symposium on River Sedimentation, Yichang, China.

Topping, D. J., Wright, S. A., Melis, T. S., & Rubin, D. M. (2006). *High-resolution monitoring of suspended sediment concentration and grain size in the Colorado River using laser-diffraction instruments and a three-frequency acoustic system*. Paper presented at the The 8th Federal Interagency Sedimentation Conference, Reno, NV.

Wood, M. S., & Teasdale, G. N. (2013). *Use of surrogate technologies to estimate suspended sediment in the Clearwater River, Idaho, and Snake River, Washington, 2008-10*: U.S. Geological Survey.
